

Sample Power BI Reports

An individual report page for points per minute, salary, minutes played, and player age. is shown below.

Tooltips trend graph shown below.

The Player Trend Analysis tab, shown below, allows the user to look at a player’s individual performance trends in all three categories and salary. This will show if a player is improving, declining, or maintain their play. A trend analysis is essential to adding context to the given metrics in this report and predicting future performance.
